

Affordable PLC splitters in Taiwan

AI Overview

Taiwan offers a range of affordable PLC splitters from reputable suppliers like SONGXIN, FOCl, and other local manufacturers, suitable for FTTH and telecom applications. Key Suppliers and Options SONGXIN Taipei Tech Solutions SONGXIN provides a variety of PLC splitters with online quotations and inquiries available, making it convenient to compare prices and select cost-effective options for different split ratios and applications. FOCl Fiber Optic Communications FOCl is a pioneer in fiber optic components in Taiwan, offering high-performance PLC splitters, couplers, and integrated modules. They provide both standard and customized solutions for FTTH, high-speed optical networks, and other telecom applications. Other Taiwanese Manufacturers Platforms like TTNET and local directories list multiple PLC splitter manufacturers offering 1x2, 1x4, 1x8, 1x16, 1x32, and 1x64 splitters. These suppliers often provide both box-type and module-type splitters fabricated with silica optical technology, suitable for cost-sensitive projects. Company Listings Companies such as SUN TELECOM, BroField, and LFO Taiwan Manufacture provide PLC splitters along with related fiber optic components. Many of these suppliers have strong R&D and manufacturing capabilities, allowing for competitive pricing and bulk order discounts. Tips for Finding Affordable Options Compare Split Ratios and Types: Lower split ratios (e.g., 1x2, 1x4) are generally more affordable than higher ratios (1x32, 1x64). Request Online Quotations: Many Taiwanese suppliers, including SONGXIN, offer online quotes to help you identify the most cost-effective options. Consider Bulk Orders: Purchasing in larger quantities can reduce unit costs. Check for Standard vs. Customized Products: Standard PLC splitters are usually cheaper than customized designs, though customization may be necessary for specific network requirements. Market Context Taiwan is a major player in the global PLC splitter market, with a growing demand driven by FTTH deployments, 5G infrastructure, and data center e...
