

Communication Temperature Control Cabinet IP54

Overview

2 mm powder-coated steel with IK10 impact resistance, a 2 mm galvanized mounting plate, and UL certification, these enclosures provide excellent protection against dust and water splashes according to IEC 60529 and EN 62208 standards. Controller of temperature and standard signals, 3 relay outputs/SSR, 1 analogue mA/V, ON-OFF, PID with auto-tuning, program up to 6 sections with a timer, servo valve control, STB / LATCH function, manual mode, Ethernet. Features robust construction, excellent durability, and IP54 protection rating. Available in various sizes with optional customization for your specific requirements. According to the IEC, IEC 60529 defines the IP code used to classify protection. Industrial air conditioners are used when the ambient temperature is higher than the desired temperature inside the cabinet (e., in steel mills or near hot processes) or when enclosure tightness is required (IP54 and higher). What can I purchase from you?

Complete sets of distribution boxes, distribution boards, control boards, control cabinets, power.
