

How much does fiber optic cable cost per ton

AI Overview

Fiber optic cable costs roughly \$200,000 to \$1,500,000 per ton, depending on type, fiber count, and construction. Fiber optic cable is typically priced by length rather than weight. Retail and wholesale prices range from \$0.09 to \$6 per foot (\$0.30 to \$20 per meter) depending on whether it is single-mode, multimode, armored, or pre-terminated. To estimate a per-ton cost, we consider that standard fiber optic cables weigh approximately 10–20 kg per 1000 feet for indoor simplex cables and up to 100–150 kg per 1000 feet for large outdoor armored cables.

Approximate Calculation

Lightweight indoor cable: 10 kg per 1000 ft, \$0.50/ft → 1000 ft costs \$500 → 1 ton (1000 kg) requires 100,000 ft → \$50,000 per ton.

Heavy outdoor armored cable: 120 kg per 1000 ft, \$3/ft → 1000 ft costs \$3,000 → 1 ton requires ~8,333 ft → ~\$25,000 per ton.

High-count backbone cable: 150 kg per 1000 ft, \$6/ft → 1000 ft costs \$6,000 → 1 ton requires ~6,667 ft → ~\$40,000 per ton. These estimates vary widely depending on fiber count, jacket type, armor, and manufacturer. Bulk purchases may reduce costs, while specialty cables (e.g., LSZH, armored, or high-strand-count) increase the price.

Key Factors Affecting Cost

Fiber type: Single-mode is cheaper per foot than multimode, but multimode may be required for data centers.

Cable construction: Armored or outdoor-rated cables are heavier and more expensive.

Length and bulk: Large orders often reduce per-foot cost, affecting the per-ton estimate.

Market and supplier: Regional pricing, shipping, and manufacturer terms can shift costs by ±20–30%. In summary, while fiber optic cable is usually sold by length, per-ton costs can range from roughly \$25,000 to \$50,000 for standard cables and up to \$1,500,000 for high-end, high-count armored cables, depending on specifications and bulk discounts.
