

To install/close cover, make sure cover and body ground-joint surfaces are clean and not scratched. Cover/body. When installing, please follow the instructions strictly and ensure installation by a professional. After confirming there. Explosionproof enclosures are used as classified enclosures, pull boxes, or control panels in rigid conduit systems and with metal clad cable rated for hazardous locations. The box's cable entry holes should be pre-reserved by the supplier. If installing the enclosure for use with Containers, not Pressure Detectors, and to maintain a Type 2 or 3R rating: For the stainless steel box (E10-076-2), drill a 1/8- 1/4. An explosion proof junction box is a sealed electrical enclosure designed to contain sparks or flames that may occur within the box, preventing them from igniting explosive gases or dust in the surrounding environment. They are commonly made of aluminum, stainless steel, or heavy-duty cast metals.

Installation Procedure Unpackage the box and check for signs of shipping damage.
Disconnect the grounding wire from the back panel. Remove the back panel, gland
plate, and mounting hardware

EPJ-2-ALU 2-Port Explosion Proof Junction Box INSTALLATION SHEET

DIRECTIONS FOR INSTALLATION WARNING: Electrical power supply MUST BE OFF
Before and during installation and maintenance.

Explosion Proof Enclosure Comprehensive Guide

"Explosion-proof enclosure is an enclosure that will prevent the ingress of any spark
or flame hot enough to ignite the explosive atmosphere." It protects gas and oil
plants, chemical units,

Installation and Wiring of High and Low Voltage

Use rubber plates to connect the tray to the explosion-proof distribution box,
protecting wires and cables. See the diagram for the connection

How to Install Explosion-Proof Distribution Box

After confirming there are no errors, close the cover, secure it with fasteners, and
tighten the nuts to seal the cable. The device is ready for use

Explosion proof distribution box standards and

Measures: Lighting explosion-proof distribution box (board) are set up in the zero line
(N line) and protective earthing line (PE line) bus, zero line and protective

EJBA IEC Ex d Explosion Protected Enclosures

Crouse-Hinds series EJBA enclosures provide IEC Ex d flameproof protection in Zones
1, 2, 21 and 22 hazardous areas.
