

Iraq Free Quotation for Cold Aisle Rack-Mounted Servers

AI Overview

SVDS Iraq provides flexible, modular cold aisle containment and rack-mounted server solutions suitable for data centers, with options to request a free quotation. Cold Aisle Containment Overview Cold aisle containment systems create an enclosed corridor in front of server cabinets, ensuring that cold air is directed efficiently into server intakes while preventing mixing with hot exhaust air. This improves cooling efficiency, reduces energy consumption, and extends server lifespan by maintaining consistent temperatures across all racks (Legrand, Eaton, Gordon Inc) . Modular designs allow for scalable deployment, retrofitting existing aisles, and adapting to various rack heights and widths . Rack-Mounted Server Solutions Rack-mounted servers are installed in 42U, 45U, or 48U cabinets, compatible with standard (600 mm) or wide (750 mm) racks. These enclosures provide organization, security, cable management, and environmental protection for IT equipment. Many systems include locking doors, clear roof panels, and IP54-rated protection for sensitive electronics . Local Supplier in Iraq SVDS Iraq offers a broad range of server racks, aisle containment systems, and modular data center solutions tailored to local requirements. Their solutions are designed for easy deployment, scalability, and energy efficiency, including prefabricated racks, rows, and modular data centers suitable for edge computing or remote locations. SVDS can provide bespoke configurations to match your space, budget, and operational needs . How to Request a Free Quotation Contact SVDS Iraq directly via their website or local office. Provide details such as number of racks, server types, aisle dimensions, and cooling requirements. Specify any modular or prefabricated solutions needed for your data center.
