

# Online Management System for Communication Towers

## Overview

Tower Management tools provide a centralized digital platform for telecommunications companies and tower owners to manage the entire lifecycle of physical site assets, from site acquisition and structural design to leasing and maintenance. Our application, infraOSS, is designed to manage Pre and Post Service Requests for cell tower deployments. Tibbo's multi-year experience in the M2M and telemetry market, as well as off-the-shelf solutions for industrial automation and IT management, help us solve the most sophisticated objectives raised by the. OpenTower iQ is a single view of truth for all data utilized for the efficient operation of cell tower infrastructure. With tower data in a single location, collaboration that is visualized through a Digital Twin becomes easy for all stakeholders involved. Plan and deliver rollout projects on time with full-process visibility. CONTROMOTE, a revolutionary remote management, monitoring, and control solution for Telecom Passive Infrastructure. It addresses the challenge of providing 99.99% uptime for Telecom Cell Sites while reducing capital and operating costs. Tower site data shouldn't live in scattered.
