A compact substation —sometimes called a packaged or prefabricated substation—is a pre-assembled unit that combines three key components: High-voltage switchgear: Manages incoming power. Transformer: Steps voltage up or down. Low-voltage distribution board: Distributes power to end users. The distribution box cost encompasses not only the initial purchase. Prices range widely depending on size (kVA/MVA), voltage level, cooling type, and application—from around \$1,000 for small distribution units to over \$1 million for high-capacity power transformers.
