

Price of a Household Double-Opening Distribution Box

AI Overview

A household double-opening distribution box typically costs between \$23 and \$2,999, depending on size, features, and brand. Typical Price Range The cost of a residential distribution box varies widely based on specifications such as amperage, number of circuits, material, and protective features. Standard household units generally fall in the \$100 to \$500 range, while premium or weatherproof models with advanced safety features can reach \$1,000 or more. Some basic breaker boxes are available for as low as \$23, whereas high-capacity or commercial-grade units can cost up to \$2,999 (Lowe's).

Factors Affecting Cost

- Amperage and Circuit Capacity:** Higher amperage and more circuit spaces increase the price. Typical residential boxes range from 100A to 200A with 12–60 circuit spaces.
- Material and Durability:** Plastic or polycarbonate enclosures are common for indoor use, while metal or weatherproof boxes with IP65 ratings are needed for outdoor or humid environments, which adds to cost.
- Safety Features:** Overload protection, short-circuit protection, residual current devices, and flame-retardant materials can increase the price but improve safety and compliance.
- Brand and Technology:** Well-known brands like Square D, Siemens, Eaton, and CHINT offer models with modular designs, smart monitoring, and digital displays, which can raise the price.
- Installation and Accessories:** Costs may also include installation, mounting rails, and additional protective covers, which can add to the total investment.

Recommendations For a typical household, a double-opening distribution box with 200A capacity and 30–40 circuit spaces is sufficient. Choosing a model with IP65 protection ensures durability for indoor or semi-outdoor locations. Investing in a quality unit reduces long-term maintenance and enhances safety, making it a cost-effective choice despite higher upfront prices. Retailers like Home...
