

Price of fiber optic cable splicing machines in Taiwan

AI Overview

Fiber optic splicing machines in Taiwan range from approximately \$248 for entry-level models to several thousand dollars for high-performance fusion splicers. Price Ranges and Models

Entry-Level Fusion Splicers: Models like the Signal Fire AI-5 4 Motors Optical Fiber Splicing Machine start at around \$248 per unit, suitable for small-scale or trial purchases and basic FTTH installations.

Mid-Range Machines: Popular models such as the Signal Fire AI-20 Fusion Splicer or ST3100F Mini Fiber Optic Fusion Machine typically cost \$1,000–\$2,500, offering higher precision, automatic fiber alignment, and better durability for field deployment.

High-End and Specialized Splicers: Advanced core alignment fusion splicers, mass fusion splicers (4-core or 16-core), and models with real-time light monitoring can cost \$3,000–\$10,000 or more, depending on features like multi-core fiber support, ruggedized design, and automation for data center or industrial applications.

Supplier Options in Taiwan

Taiwan hosts several suppliers and distributors of fiber optic splicing machines, including both local companies and international brands with regional offices. B2B directories list companies that provide fusion splicers, fiber cleavers, OTDRs, and related accessories. Major global brands like Fujikura also have distributors in the region, offering a range of machines from portable cladding alignment splicers to high-performance core alignment units for telecom and R&D applications.

Considerations for Purchase

Application Type: FTTH, data center, or industrial networks may require different splicer types.

Fiber Type: Single-mode fibers require higher precision core alignment splicers, while multi-mode fibers can use standard fusion splicers.

Features: Automatic fiber type detection, touchscreen interfaces, battery life, and ruggedized design affect both price and usability.
