

Price of fiber optic patch cord with flange

AI Overview

Fiber optic patch cord box flanges typically range from \$30 to \$150 depending on port count, connector type, and enclosure features. Price Overview Small wall-mount enclosures with 6 ports and SC connectors are available for around \$35–\$50 on Amazon, including pigtails and flanged couplers. Higher-capacity or LGX-style panels with multiple ports, LC/SC compatibility, and pre-installed fiber pigtails can cost \$80–\$150 depending on the number of strands and included accessories. Custom or industrial-grade enclosures from suppliers like Fibertronics or FS Europe may exceed \$150, especially if they include bend-insensitive fiber, high-density flanges, or compliance with ITU, UL, CE, and RoHS standards. Factors Affecting Price Port Count: More ports increase the cost due to additional couplers and fiber pigtails. Connector Type: SC, LC, or ST connectors have different pricing; LC connectors are often slightly more expensive. Enclosure Type: Wall-mount vs. rack-mount, metal vs. plastic, and indoor vs. outdoor rated enclosures affect cost. Included Accessories: Kits with pre-terminated pigtails, color-coded strands, and protective jackets are priced higher. Compliance and Quality: Industrial-grade flanges with certifications (UL, CE, ITAR) or low insertion loss ferrules may increase the price. Where to Buy Amazon: Offers ready-to-use kits with SC or LC ports and wall-mount enclosures. FS Europe: Provides a wide range of patch leads and high-quality fiber enclosures for professional installations. Fibertronics: Custom cable assemblies and flanged enclosures for industrial or high-performance applications. FiberOptic Supply: Bulk materials, patch cords, and consumables for network setups. For a standard 6-port SC wall-mount fiber optic box flange, expect to pay around \$35–\$50, while larger or higher-specification enclosures can reach \$150 or more depending on features and included accessories.
