

Prices from manufacturers of high-polymer anti-corrosion cable trays

AI Overview

High polymer anti-corrosion cable trays typically range from \$20 to \$150 per meter, depending on material, size, and supplier. Overview High polymer cable trays are made from advanced polymer materials, offering excellent corrosion resistance, UV resistance, and chemical durability, making them ideal for harsh industrial, marine, or chemical environments. They are non-conductive, lightweight, and easier to install than metal trays, though they may have lower heat and fire resistance compared to steel or aluminum options. Some specialized high polymer trays are modified for acid, alkali, or wet environments, enhancing their anti-corrosion properties. Price Range Standard polymer cable trays: Approximately \$20–\$50 per meter, suitable for general industrial or commercial applications. Flame-retardant or high-performance anti-corrosion trays: Around \$80–\$150 per meter, depending on thickness, width, and load capacity. Customized or modified high polymer alloy trays: Prices may exceed \$150 per meter, especially for specialized chemical-resistant or high-strength applications. Prices vary based on tray dimensions, load rating, and additional features such as lids, couplers, or mounting accessories. Suppliers often provide FOB, CIF, or EXW pricing, and bulk orders may reduce per-meter costs. Suppliers and Purchasing Alibaba and Apex Tray: Offer a wide range of polymer cable trays with options for samples and bulk orders. Hesheng Group: Provides flame-retardant, anti-corrosion polymer trays suitable for industrial and chemical environments, with CE, CCC, and ISO9001 certifications. NHC FRP: Specializes in fiberglass-reinforced polymer trays with high strength, corrosion resistance, and flame-retardant properties. When purchasing, consider environmental conditions, load requirements, and installation ease to select the most cost-effective and durable option. Requesti...
