

Single-mode dual-fiber SC interface fiber optic switch

Overview

The ANSM-206FCS (SC Connector; Single-mode) is an unmanaged, 4-Port Industrial 10/100 Base-T (X) with Dual 100 Base-FX Switch that secures data transmission by using fiber optic transmission to provide immunity from EMI/RFI interference. Fiber media converters quietly solve a big, practical problem: they bridge copper Ethernet to fiber and extend links far beyond copper's reach. In real networks such as campuses, factories, metro POPs converters let you reuse existing switches and still run fiber for long distance, EMI immunity. The 10/100/1000 Mbps Single Mode Dual Fiber 20KM SC Port Ethernet-to-Fiber Media Converter is a professional media converter designed for long-distance Ethernet-to-fiber network transmission. It supports high-speed Gigabit and Fast Ethernet and converts signals between copper and fiber links. Dual SC single-mode fiber port for connections over distances of up to 18.6 miles (30 km) Fiber Optic Port: 1. 25Gbps, Fiber Type SMF 1310nm Wavelength, 2x RJ45 Port: CAT5E/CAT6 10M/100M/1000M, Cable Type: UTP/STP Cat. It uses Ethernet for transmitting a signal up to 15 Km, and. QuickSwitch® Remotely Controllable Fiber Optic Switches to support such applications as Commercial Networks, Industrial Networks, and MiL Spec Operations.
