Overview

The internal configuration of the single-phase distribution box consists of one phase (L), one neutral (N), one earth (PE) wire, and a single-phase busbar system. It also has the main switch and multiple MCBs for branch circuits, as well as for leakage protection with RCD or RCBO. The distribution box (DB box) helps safely and efficiently distribute electrical power. Today, electrical systems are essential for homes and industries. We also highlight how reliable manufacturers like NUOMAK support stable, compliant, and cost-effective power distribution. A distribution box is a key part of electrical systems in buildings.
